

## TEMPERATURE MONITORING SYSTEM

Capable of monitoring up to 25 wireless sensors, Guardian Plus is the ideal solution for providing a reliable low-cost means of monitoring medium to large scale installations with multiple refrigerators over a small area.

Guardian Plus utilises Bluetooth sensors to measure both temperature and /or humidity readings, which are sent via a wifi portal to the cloud based servers housing the Sentry temperature monitoring platform. Where the client does not have, or does not wish to use their own wifi network, a wifi/4G modem can be supplied, providing a “stand-alone” installation.

The system, provides timely alerts via SMS, email and the Sentry App, as well as daily temperature email reports. Information can also be easily accessed anytime via web browser or the Sentry App.

### Key Features

- ▷ Monitor up to 25 wireless sensors
- ▷ Adjustable reporting intervals of 5, 15, 30 and 60 minutes
- ▷ Operates on the Sentry temperature monitoring platform
- ▷ Alerts can be sent to multiple users via SMS, email and Sentry App
- ▷ Daily and weekly compliance reporting with 12 months back-up history
- ▷ Multiple user access anytime, anywhere via web browser or Sentry App
- ▷ Accurate sensor temperature measuring technology
- ▷ Sensor comes with multi-purpose mounting for easy and quick installation
- ▷ 10 year plus sensor battery life
- ▷ Easy sensor calibration
- ▷ Collector battery back-up in event of power outage
- ▷ Automatic software updates
- ▷ Full audit trail from sensor through to SMS alert service

### Options

- ▷ All-weather collector for mounting in outdoor applications
- ▷ Wifi / 4G modem

# Applications

All Sentry monitoring products, including Guardian Plus, utilise the Sentry temperature monitoring software platform, providing an integrated monitoring and reporting system that consolidates the data from multiple temperature-controlled storage devices, and multiple sites, into simple, easy to view reports.

This allows scalability and different Sentry products to be used in combination with each other to provide the optimum integrated solution for any given application.

Applications of Sentry temperature monitoring products include transportation, receipt, storage, processing and despatch of temperature sensitive goods in the food, pharmaceutical and medical industries, as well as climate-controlled environments including computer server rooms, laboratories and specialized manufacturing and storage facilities.

Food Industry

Climate Control

Manufacturing

Laboratories

Pharmaceutical

Whatever your application, Sentry can provide a low cost, easy to install solution for you.

## SENTRY SOLUTIONS

### SENTRY PRODUCTS

CENTAUR

WATCHMAN

GUARDIAN

TEMPCHECK

TAPAWASEE

### SENTRY OPERATING SYSTEM

- Standard operating platform for all Sentry products
- Easy access via app or web browser
- Multiple users with tiered access
- Temperature history
- 7 day graphs
- Automated daily temp checks

### SENTRY OUTPUT

- Comprehensive reports
- Personalised SMS & email alerts
- Daily temperature reports
